

# JULIO EDUARDO RIBEIRO KOZAREWICZ

## Contact Information:

**Email:** julioerk@outlook.com  
**Phone:** +55 41 99710-6474  
**LinkedIn:** [www.linkedin.com/in/juliokozarewicz](https://www.linkedin.com/in/juliokozarewicz)  
**GitHub:** [www.github.com/juliokozarewicz](https://www.github.com/juliokozarewicz)  
**Portfolio:** [www.juliokozarewicz.com](https://www.juliokozarewicz.com)

## Education:

### ESTACIO

**Feb 2024 - Mar 2028**

Bachelor of Software Engineering  
Curitiba, Brazil

### FESP-PR Jan 2017 - Dec 2021

Bachelor of Economics Curitiba, Brazil

## Skills:

**Backend:** Java (Spring), TypeScript (Node, Express, Nestjs)

**Frontend:** JavaScript, TypeScript, React JS, Tailwind, HTML, CSS

**Others:** PostgreSQL, MySQL, MongoDB, SQLite, RESTful APIs, Microservices, Accessibility, CI/CD, AWS, Docker, Docker Compose, Kubernetes, WebSockets, OAuth, JWT, Performance, Redis Cache, Memcached, Nginx, RabbitMQ, Kafka, Redpanda, Ansible, Cloud Functions, Load Balancing, Auto Scaling, Message Queues, Event-Driven Architecture, API Gateway, Monitoring & Logging, Reverse Proxy, Cloud Storage, Git, Postman, Linux.

## Experience:

### Java Backend Developer (Jan 2024 - Present)

Nuvior (Curitiba, Brazil)

Developed and maintained backend systems and RESTful APIs using Java 21 and Spring Boot, ensuring high performance, scalability, and security. Managed microservices architecture with PostgreSQL, Redis, and Kafka, and handled cloud deployments, Docker/Docker Compose, CI/CD pipelines, and monitoring.

### Full Stack Developer (Dec 2022 - Feb 2025)

Freelancer (Curitiba, Brazil)

Web application development with TypeScript, JavaScript, HTML, and CSS. Building responsive interfaces, implementing RESTful APIs, and working with frontend and backend frameworks. Optimizing performance, accessibility, and cross-browser compatibility. Version control with Git, cloud deployment, and CI/CD pipelines.

## Projects:

### **Gatekeeper: Corporate Module Access Management API (Nov 2025 - Jan 2026)**

RESTful microservices API built with Java 21, Spring Boot 3, Hibernate, Spring Data JPA, PostgreSQL, Redis, Docker/Docker Compose, NGINX, JWT/Refresh Tokens, Argon2, JUnit 5, Mockito, JaCoCo, implementing complex business rules and 95%+ test coverage.

### **Financefx: Personal Finance Management System (Feb 2025 - Mar 2025)**

Personal finance system using Java (Spring) with a microservices architecture to provide high performance, scalability, and maintainability.

### **Gasoliqui: API that tracks water and gas usage with AI insights (Aug 2024 - Oct 2024)**

API development with TypeScript (Node.js) for backend application.

### **Climather: Weather forecast application (Jan 2024 - Apr 2024)**

Mobile application developed with JavaScript (React Native).
